Overview

Experienced Frontend Developer with over 4 years in software development, specializing in **JavaScript, CSS, React, and Next.js**. Proven ability to excel both as a team player and an individual contributor. Passionate about exploring new technologies and dedicated to optimizing code infrastructure.

Technical Skills

Languages: JavaScript, Typescript, PHP

Web Frameworks & Libraries: React, Next.js, Redux, Tailwind, React Testing (Jest, React Testing Library), React Query

Web Technologies & Tools: Git, SCSS, REST API, Headless CMS, Apollo GraphQL

Other: Figma, UI/UX fundamentals

Professional Experience

[Bet Technology](#) | Sydney, Aus | Pioneer online betting Industry based on SaaS solutions

Software Developer | Full-time (Remote) | March 2022 – Present

- Designing and developing more than 20 web apps with four different themes in **Microsoft Azure DevOps** Git repositories. Updates were facilitated through pipelines and auto-deploy scenarios. Resulting in enhancement of visibility of the main industry.
- Delivered a **Jamstack** Application using **React** and **Next.js** to read **GraphQL** data retrieved from a **Headless CMS**.
- Implemented the Upcoming Events Calendar page using **Swagger-based API** endpoints and employing technologies such as **Tailwind CSS, React**, and the **Axios** library for React. The on-site calendar simplifies the process of placing odds for gamblers without requiring them to leave the website, resulting in **less bounce rate**.
- Redesigned the company **blog website**, integrating REST API calls to display sports data on dynamic posts. Revamped the blog **dashboard** to facilitate content writers in sharing odds-related tips and triggering **website optimization** to achieve loading times under 4 seconds.

[205th Designs](#) | Miami, FL | Digital Marketing Agency

Frontend Developer | Full-time (Remote) | March 2021 – January 2022 (1 year)

- Improved processes by creating layouts from scratch (UI/HTML/CSS/JavaScript/React/Next.js), saving the company over \$2000 monthly by not needing an extra designer.
- Acted as key stakeholder for multiple website and web application projects for various industries including non-profit and e-commerce clients.
- Had an effective contribution to search engine optimization (SEO) for the Kemistry Nightclub vendor after leading the frontend team in developing their app using React+Next.js.

[TTS](#) | Dubai, UAE | Cryptocurrency Exchange

Web Developer/Designer | Full-time (Remote) | September 2020 – March 2021 (7 months)

- Significant contributions were made in the development of different websites and platforms, such as a simple cryptocurrency exchange enabling the purchase of the token (TTS) using **JavaScript** and **Enterprise APIs**. This included integration with payment methods like PayPal and credit cards.

[Mizbanfa](#) | Isfahan, Iran | Famous server provider in Iran with more 80 million population

Web Developer/Designer | Full-time (On-site) | February 2020 – September 2020 (8 months)

- Performed cross-functionally as both web developer and also as support agent lending development expertise towards customer issues improving customer satisfaction.
- Participated in **Search Engine Optimization** activities to optimize internal website to increase visibility and improve site visits (Up to 14k/day).
- Assisted clients with a wide variety of technical issues including **hosting, DNS, IP change, IP connections**, and APIs decreasing client website downtime by 0.1%.

Education

Bachelor of Science in Engineering, Hakim Sabzevari University, Iran (GPA: 3.44)
